Triand Overview

Triand is a user friendly way to transfer student transcripts between schools, districts and colleges.

Triand introduces social networking for public education. Designed with collaboration functionality, teachers can help other teachers, schools can help other schools, and districts can help other districts.

While Triand works with other web browsers, Firefox is the recommended web browser for Triand. You may download Firefox for free from: http://www.firefox.com.

Upon logging into Triand, you will notice that the interface is divided into two sections – (1) the navigation bar and (2) the main working area.
