

StudentGPS: Active Directory

Issue 1

September 2, 2016

Active Directory Account Managers have the ability to add and delete Active Directory accounts via SSO. The EdFi Group Manager has the ability to grant EdFi security group membership for existing Active Directory accounts via SSO. In order for a user to have access to the StudentGPS Dashboards they must be placed in the appropriate EdFi group within Active Directory. The dashboards include the following groups that may be assigned to district users:

EdFi District Administrator

- Access to all teachers, staff and students within the district
- Aggregated student performance metrics at the district level (district information and academic dashboard)
- Drilldowns to campus lists
- School academic and operational dashboards for all schools in the district, with classroom views and student lists, teacher lists and metrics (operational dashboard)
- Student dashboards with individual performance metrics for all students in the district (student information, academic dashboard and transcript)
- Access to Goal Planning page to manage and publish campus goals (% of students achieving dashboard thresholds)

EdFi School Administrator (Principal/AP)

- Access to all teachers, staff and students within a school
- Aggregated student performance metrics at the school level for the assigned school (school information and academic dashboard)
- Student list drill down displays all students in assigned school
- Tabular view of student metrics for all students in each class within assigned school (classroom dashboard) as well as by grade and demographic group
- Student dashboards with individual performance metrics for all students in the assigned school (student information, academic dashboard and transcript)
- Teacher lists and teacher performance metrics for all teachers in the assigned school (school operational dashboard)
- No access to Goal Planning page to manage and publish campus goals

EdFi Counselor/Leader

- Access to all students within the district
- Aggregated student performance metrics at the assigned education organization level for the assigned education org – district or school information and academic dashboards
- Student list drill down displays all students within assigned school or district
- Tabular view of student metrics for all students in each class within assigned school or district (classroom dashboards)¹¹
- Student dashboards with individual performance metrics for all students in the assigned school or district (student information, academic dashboard and transcript)
- No access to teacher performance metrics (operational dashboards)

EdFi Teacher

- Access to all students within his/her class
- Aggregated student performance metrics at the assigned education organization level – district or school information and academic dashboards
- Student list drilldown filters to ONLY include assigned students
- Tabular view of student metrics for all students in teacher's class(es) within assigned school or district (classroom dashboard)
- Student dashboards with individual performance metrics for all students in the teacher's class(es) (student information, academic dashboard and transcript)
- No access to teacher performance metrics (operational dashboard)

EdFi Staff

- ***For Educational Cooperative Use Only***

- System Administrators need to be placed in the System Administrator and District Administrator groups. (*System Administrators are the only users that should be assigned to 2 Active Directory groups.*)
- User groups must be assigned at the district level.
- EdFi District Administrator group members do not need to be in the eSchoolPlus staff catalog to login.
- Username must be correctly spelled and match the Financial Management System job codes.
- Users should only be assigned to only 1 group.
- Users' Active Directory groups should match the Financial Management System job codes.
- Only the district Active Directory Account Manager can unlock or enable the account.
