# Tutorial - Local Assessment Upload

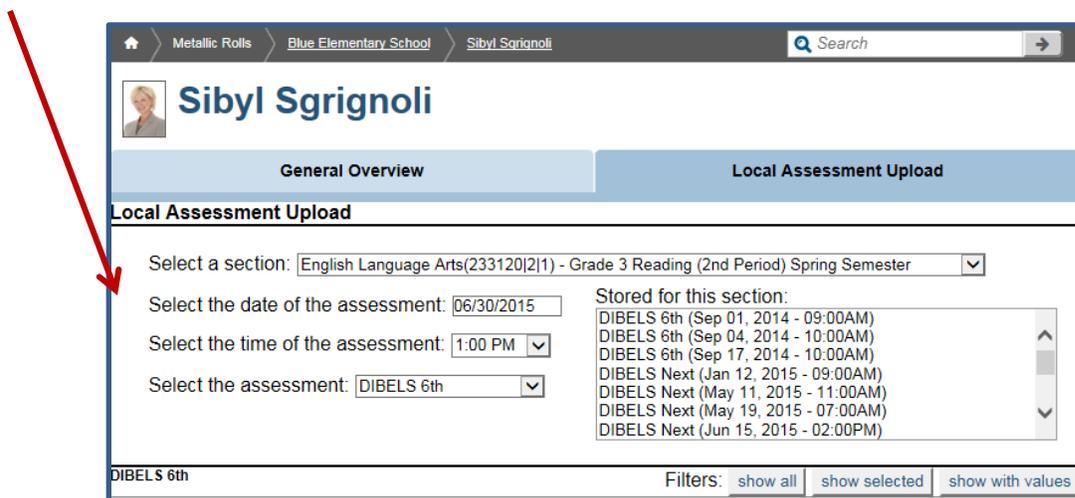

The StudentGPS dashboards have been expanded to include a local assessment upload feature for teachers. From the local assessment upload tab, you can choose to enter data for DIBELS 6<sup>th</sup>, DIBELS Next, DRA, DSA, and STAR assessments. Templates have been pre-loaded in the dashboards. You can select specific courses to populate the student portion. Then results will be entered into a simple upload feature.

## Entering Local Assessment Data

1. After logging into the dashboard there will be two tabs you will see on the Teacher Landing Page. Select 'Local Assessment Upload' to enter data.

2. A Local Assessment Form will populate and you can then select a section, the date and time of the assessment, and the assessment type. You can also see previously stored assessments.

3. After you select the assessment type you will see the template for your selected assessment will automatically populate below with your student list. Notice there is a check box to the left of your student names. The checkboxes allow you to select a specific group of students. You check the box next to the students you wish to display and then click the 'Show selected' button so only the selected students will display. This does not erase any information on students you did not have selected. If you wish to show all students again simply click the 'show all' button and all students will display in the list.
