

Tips for Triand Account Owners

Triand Account Owners are considered district level system administrators of the system and have capabilities that other users do not.

This document will provide additional information and tips to help Triand Account Owners.

Profile

Since the Triand Account Owner is a district level role, account owners should not have a school name in their profiles in order for permissions to work properly. Once permissions are established between the account owner and the state-level account owner, if the account owner works at a specific school within the district, the school can be added after initial permissions are established by notifying the state-level account owner of the change.

A screenshot of the Triand Account Owner profile form. On the left side, there is a red outline of an apple with a stem and leaf. Below the apple is a purple button labeled "Upload photo". On the right side, there are several input fields with labels in purple: "First" (Jane), "Middle" (empty), "Last" (Doe), "Email" (jane.doe@mailinator.com) with a subtext "What you'll use to log in.", "State" (AR - Arkansas) with a dropdown arrow and subtext "Where your district/school is located.", "District" (HOT SPRINGS SCHOOL DISTRI), "School" (empty), "Job Title" (Triand Account Owner), and "State-ID" (5481164318) with subtext "Managed by your State Education Agency.". At the bottom right, there is a purple button labeled "Save".

The "Job Title" field is optional and can contain any information a user prefers.

My Friends

Besides assigning permissions, Account Owners have options in the Friends area that are not available to other users. For assistance with granting users access, please see the "Assigning Permissions" tutorial.

- The full email address is displayed for all users in your district (**Note:** All users should be using their school issued email address pursuant to Arkansas Department of Education [ADE] security policy as referenced in *Commissioner's Memo RT-09-010* dated *03/27/2009*).
 - Ensure that the email address, district, and school name are correct for a user when assigning permissions. If not, you should request the user log in and update their profile information before assigning access.
 - If more than one account is listed for a user, be sure that you are assigning permissions to the correct account (**Note:** Accounts with no email address listed are "dummy" accounts created for state ID purposes; there are no emails tied to these accounts; therefore, the users will have no access to the Triand system. For teachers and others in the teacher catalog in eSchoolPLUS, email addresses should be listed in the teacher catalog to remove the "dummy" accounts.)

	<p>Barrett, Linda barrettl@hssd.net - no job title - HOT SPRINGS INTERMEDIATE HOT SPRINGS SCHOOL DISTRICT</p> <p><i>At HOT SPRINGS INTERMEDIATE, HOT SPRINGS SCHOOL DISTRICT: Linda can view your lessons and resources Linda can view your tests, items and reports Linda can see your records for school'</i></p> <p style="text-align: right;">Remove Friend</p>

- If a user has not activated his or her account, the email address will display in **red**. Accounts that have been activated will display the email address in **purple**. **Note:** Permissions will not work until a user has activated his or her account.

- If a user changes their district and/or school name after you have granted permissions to the user, you will be prompted to share with user at a new location. **Note:** If you do not authorize or share at the new location, permissions will remain for what was previously in the user’s profile.

It is a good idea to check your Friends list on a regular basis to ensure all information is up-to-date.

Students

In order for changes to an inactive or graduated student to be reflected in Triand, the school district must mark the student as "active" in eSchoolPLUS, wait until the nightly update between eSchoolPLUS and Triand, and then remark the student as "inactive" in eSchoolPLUS or the district's Student Information System. Triand only pulls information into the system for students who are active in eSchoolPLUS.

Classes

To view a list of classes for your district, go to "classes" and set the filter to "Find classes at my district". You can filter by grade or typing the school name to narrow results if you do not wish to display classes in the entire district.

For any grade ▼

Add your classes

Download list

You can download a list of classes that will include each student's state and local ID and first and last name; the subject, grade level, and name of the class; the period the class is scheduled; and the email address of the teacher.

Clicking on a class name in the search results will display a list of students scheduled in that class.
